INDEX FOR VOLUMES 1, 2 AND 3

This index is a reference to individual names, both authors and bibliographic citations, important subject headings, and CA departments. Missing are name references in Steven Polgar's article on Health and Human Behavior: Areas of Interest Common to the Social and Medical Sciences (3:159); because of the length of the bibliography in this case it is unfeasible to index it. The sign § refers to Our Readers Write; the letter "n." means that the reference is found in a footnote.
